

Журнал инцидента prompt injection

Шаблон v5

Для direct/indirect prompt injection, anomalous retrieval, tool abuse, privilege misuse и export attempts.

A. Идентификация

Поле	Значение
Incident ID	
Дата/время UTC и local	
Criticality	
Status	
Owner	
Agent / instance_id	
Initiating user	
Task/session/trace ID	

B. Сценарий

Поле	Значение
Type	
Source artifact/URI	
Attacker-controlled content	
Target/action	
First anomalous event	

C. Policy и telemetry

Поле	Значение
Policy version	
PDP decision	
PEP	
Syslog/NetFlow/trace references	
Retrieval/export volume	
Triggered limits	
Blind spots	

D. Containment

Поле	Значение
Block time	
New sessions stopped	
Access revoked	
Refresh revoked	
Runtime re-attested	
Policy changed after incident? If yes: version/change/approver	

E. Recovery

Поле	Значение
Credentials reissued	
Rights after reissue verified	
Rollback/compensation	
RTO target / actual	
Irreversible effects and notifications	

F. Root cause

Поле	Значение
Почему инцидент произошёл	
Почему контроль не предотвратил или не обнаружил раньше	
Policy/runtime/tool/RAG changes	
Owner and due date	

Поле	Значение
Retest result	

G. Closure

Поле	Значение
Old credentials invalid	
New session uses current policy	
Rollback/compensation completed	
Blind spots eliminated or accepted as documented risk	
Threat model/tests/runbook updated	
Closure approver/date
